

# Portable Translation Device

## Turn the device ON/OFF

- Use the power switch on the outside of the box

## Taking a Photo

- Use the Take Photo option on the main page where the camera preview is enabled.
- Camera preview will pause for a few seconds and freeze the UI for approximately 10 seconds.

## Navigate the device application

- Using the buttons in the right side panel of the screen (History/Settings/Take A New Photo/View Translation)

## Changing Settings

- While on the Settings page, tap on one of the options you want to change, a drop-down will appear
- Select the option you would like from the drop-down list
- Upon selection the demo textboxes will update with the new setting
- This change updates the styling of the History and Translation page text

## Deleting Saved translations

- While on the History Page, select a file and use the Delete Save button on the right panel

## Viewing Image/Text on Translation page

- While on the Translation page, using the bottom right button will switch between image and text mode
